PROFESSIONAL SUMMARY

Junior full-stack developer (Laravel, PHP, React, Inertia.js, Tailwind CSS, MySQL) maintaining and improving three production systems at a cooperative company, with a focus on accounting controls, attendance and payroll data, and mobile-friendly interfaces. Owned the frontend of a three-role approval workflow system during OJT, and solo-built a full-stack gym management platform, defended as my thesis. Open to remote part-time and freelance work.

TECHNICAL SKILLS

Frontend: React, Inertia.js, Tailwind CSS, JavaScript, TypeScript, HTML, CSS, Chart.js, responsive design
Backend and data: PHP, Laravel, Eloquent ORM, MySQL, schema design, RESTful patterns
Tools: Git/GitHub, responsive and browser verification

PROFESSIONAL EXPERIENCE

Junior Full-Stack Developer, People's Multi-Purpose Cooperative Sep 16, 2026 – Present

- Maintain and improve three inherited internal systems (People's Information System, WorkForce/Daily Time Record, General Merchandise). Trace issues through Git history, ship scoped fixes, and verify with responsive browser checks.
- **PIS:** Implemented approval-based correction workflows for posted financial entries (pending Debit/Credit edits, account-title changes, controlled reversal and rebooking) that keep original and proposed values, reasons, and audit history.
- **PIS:** Added separate Petty Cash, loan, and collection balance tracking with date-aware validation, bank-deposit reconciliation workflows, and daily disbursement reports. Added monthly financial locks (five-working-day grace period) with audited corrections.
- **PIS:** Built a reviewed member-import flow (staging, provenance, conflict handling, approval before commit) and improved role and office authorization and private delivery of profile photos and signatures.
- **WorkForce/DTR:** Repaired individual and bulk payslip PDFs and corrected effective-dated employee shifts while preserving recorded punches, hours, saved payroll figures, and draft status. Improved mobile punch controls, four-punch attendance timelines, and employee correction requests.
- **WorkForce/DTR:** Configured final DTR review with before/after history, office-grouped payroll input with calculation snapshots, server-side 13th-month draft recalculation, and monthly Excel exports.
- **General Merchandise:** Deployed a responsive sidebar, dashboard, product-form, and touch-control refresh. Built inventory valuation (cost × quantity) and monthly branch reports with stale-stock safeguards locally (not yet deployed).

Software Developer Intern (OJT), DepEd Schools Division Office of San Jose City Feb – Mar 2026

- Owned frontend development for the CS Form No. 6 Digitalization System (React, Inertia.js, Tailwind CSS), moving a paper-based leave request process online with Applicant, Admin, and Approver interfaces.
- Built validation, role-based screens, e-signature upload, and print-ready forms with domain-grouped components.
- Integrated with the Laravel backend built by a teammate and coordinated production deployment and maintenance with him. Completed 342 OJT hours with a 98/100 performance rating.

PROJECTS

Gym Management System Solo-built, thesis defended

- Built with PHP and MySQL: Admin, Trainer, and Client portals with role-based access, session booking, and QR attendance.
- Added a POS and inventory module with low-stock alerts and printable receipts, revenue analytics with Chart.js, audit logs, and one-click database backup.

EDUCATION

Bachelor of Science in Computer Science Sep 2022 – Jul 2026

STI College San Jose | Presidential List (2022)

CERTIFICATIONS AND AWARDS

- DepEd SIPP OJT Certificate of Completion (Feb – Mar 2026); Cisco: Introduction to Cybersecurity (Sep 2025)
- Oracle Academy: Java Fundamentals, Terms 1 & 2 (2023); ThinkQuest Champion, Tagisan ng Talino (Mar 2025)
